

Alfa Laval AXP 52 AN

Fusion-bonded plate heat exchanger for extreme high-pressure applications

Introduction

Alfa Laval AXP AN is specially designed for high-pressure applications with requirements for 100% stainless steel, for example, high pressure ammonia systems or compressor cooling.

Applications

Designed for applications requiring 100% stainless steel.

Because of their high-pressure performance, they are particularly well-suited to CO₂ applications, such as transcritical gas cooling.

Benefits

- Tolerates extremely high operating pressures
- Compact
- Easy to install
- Self-cleaning
- Low level of service and maintenance is required
- All units are pressure and leak tested
- Gasket free
- Copper free

Design

The AlfaFusion filler material seals and holds the plates together at the contact points ensuring optimal heat transfer efficiency and pressure resistance. Using advanced design technologies and extensive verification guarantees the highest performance and longest possible service life.

AXP AN are fusion-bonded plate heat exchangers with thin external frames in carbon steel that are able to withstand extremely high operating pressures.

Always delivered with lifting lug for easy handling.
